## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 6-16 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-5 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Iwamatsu et al. (High-Speed 0.5  $\mu\text{m}$  . . .) in view of Agari (JP 6-224302) and Chen et al.

See reasons of record in the Office action of 20 December 2000.

### ***Conclusion***

Applicant argues that the Chen teaching refers to an upper wiring line. Chen et al. states at column 7, lines 29-33, "With appropriate doping concentration in recessed region 20, the RC time constant in the body link or recessed region 20 from a respective channel to substrate contact 39 can be as short as or less than 1 nsec." It is clear that the recessed region or body link is addressed, because this is exactly what the sentence says. (Recessed region 20 is not an upper wiring line, as can be determined from the cover figure of Chen et al.) Applicant argues also that recessed region 20 "is not concerned" with region 32 of the Chen device. Recessed region 20 is in direct contact with region 32, as can be seen from the cover figure, and provides the current

path from region 32 to substrate contact 39, as shown in Chen figure 3. Applicant argues that the RC time constant of concern to Chen et al. may not derive from the capacitance of the MOS transistor and the resistance of the transmission path. There do not appear to be any other sources for resistance or capacitance in the Chen device, however.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
